

MCQ Set - Edge-Case Option Layouts

Table cells, checkboxes, slashes, columns and statement combinations

1. Which activity belongs to the testing phase?

- ☐ Writing unit tests
- ☐ Creating UI mockups
- ☐ Gathering requirements
- ☐ Deploying to production

Options are arranged in two columns with empty checkbox-like squares.

2) Which pair is an example of black-box testing techniques?

Equivalence partitioning / Boundary value analysis
Statement coverage / Branch coverage

Each option is a phrase; individual choices inside it use a slash.

Question 3. Select the correct meaning of the following abbreviations.

API = Application Programming Interface	API = Applied Program Instruction
API = Application Process Integration	API = Automated Platform Instance

Four unlabeled options are placed inside table cells.

MCQ Set - Edge-Case Option Layouts

Table cells, checkboxes, slashes, columns and statement combinations

4. Consider the following statements about Agile development.

Statement I: Agile welcomes changing requirements.

Statement II: Agile releases working software only once at the end.

Both I and II are true

Both I and II are false

I is true but II is false

I is false but II is true

Statement-combination choices have no labels and may resemble normal text.

5) Find the correct sequence for handling a bug report.

Report → Triage → Fix → Verify

Fix → Report → Verify → Triage

Triage → Verify → Report → Fix

Verify → Fix → Triage → Report

6. Pick one of the following: None / One / Many / All

The possible answers are inline, separated only by slashes, and do not have option labels.
